

Transport Launch

Our new topic got off to a flying start this week with a visit from Charlotte - a British Airways air hostess.

Charlotte gave us lots of information about what it's like working on an aeroplane and all of the different countries that she's been to.

We were able to ask her lots of questions about what she does and the things that she did when she visited Egypt; she even brought in some souvenirs for us to look at. We had so much fun and some of us also got to try on her hat!

To celebrate our topic, we enjoyed a fantastic trip to the British Motor Museum. We learnt about Mr Benz, who created the first vehicle but it didn't look anything like our cars today! We were also allowed to sit in an old-fashioned car.
